

### Core Protocol Development Proposal

- Proposal No:** 002
- Date:** 2021-02-19
- Description:** The Ravencoin Foundation proposes to fund the incorporation of hardware wallet support in the Ravencoin core QT wallet
- Amount:** USD \$10,000, payable in USD or RVN equivalent, for the first hardware wallet incorporated, including all necessary changes to the QT interface, unit tests, and functional tests, paid upon merged pull request to master on the [Ravencoin GitHub](#)
- USD \$5,000, payable in USD or RVN equivalent, for each subsequent hardware wallet added upon merged pull request to master
- Requirements:**
- (1) incorporate hardware wallet support for RVN and asset transaction signing
  - (2) include all necessary changes to the QT interface for hardware wallet selection at startup and for hardware wallet use at the point of transaction signing
  - (3) submitted code must be ready for deployment on both mainnet and testnet with all necessary unit and functional tests

# RAVENCOIN FOUNDATION

**Funding:**

Anyone interested in funding a portion of this development proposal may submit RVN to the following Ravencoin address:

**Shortfall/Excess:** In the event the above-referenced address has a shortfall at the time a successful pull request is merged with master, the Ravencoin Foundation will fund the difference. Any excess funds donated to the above-referenced address will be transferred to a general purpose Foundation wallet if the Foundation determines that the original purpose of this proposal has been satisfied.
